- Bathroom(s)

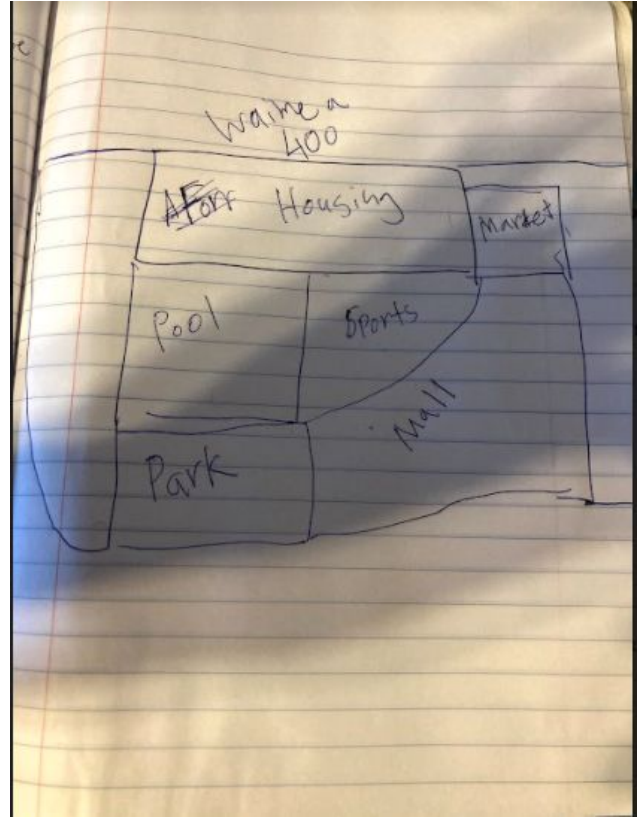

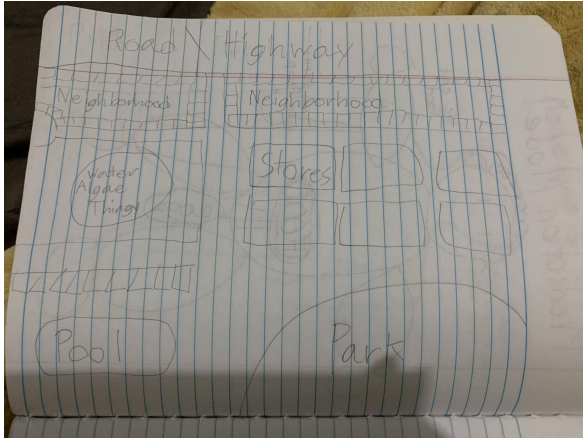

Neighborhood(Housing)

- Condos
- Use up to $\frac{1}{3}$ of the land
- Small houses
- Two-story houses
- Priority for Locals

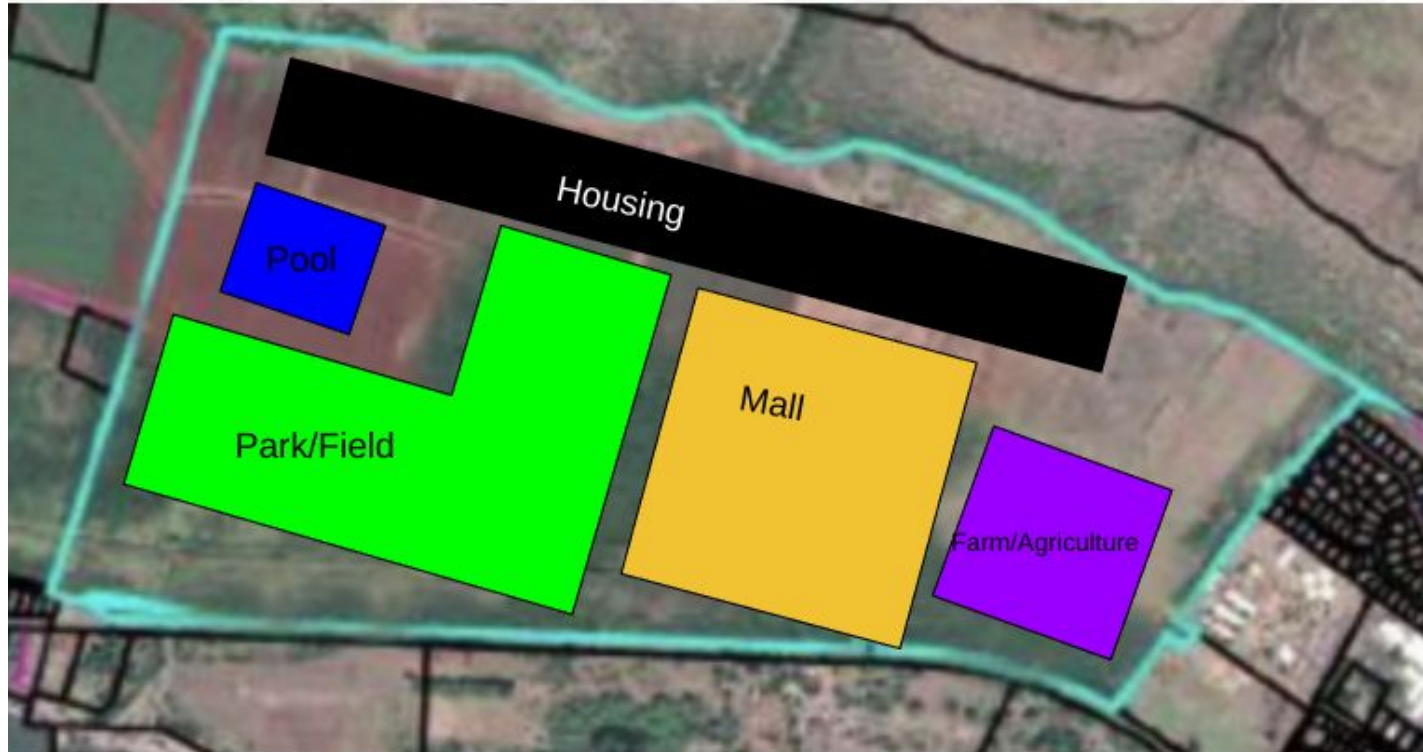

Other

- Grocery Stores
- Businesses
- Restaurants
- Pool
- Pastures
- Graveyard
- Church

Sketch

Map

Map Description

The things that we put on our map are housing, parks, pool, stores, restaurants, mall and farm land. We think we should have these things in the community so people have everything they need to live. We decided that most of the land should be used for affordable housing. Obviously the housing needs clean water, electricity, etc. By putting things like a pool, a mall and parks the people in the community can have places to get along. Also the parks could be used for kids to play sports. We think by having stores, restaurants, ect there will be more job openings. We think the people working in the stores and restaurants should be students at the high school. By adding some businesses into Waimea 400 it will be better for the economy on this island.
